ONLINE EVENT

April 26th | 4:30^{pm} CEST / UTC+2

Title: The Skills Stack for Resilience

Abstract:

Resilient individuals (and organizations) are more important than ever. This session will help you understand resilience as a response to trauma that is a blending of adaptive, anticipatory, and transformative responses. The presentation will help you identify a specific stack of micro-skills associated with resiliency and give you a framework for improving resiliency. Further, you can see this stack as a foundation for your unique perspective of management and leadership.
