# I AM SPEAKING AT:

2021 | IPMA GLOBAL  
**BEST PRACTICE WEEK**  
ONLINE EVENT

April **27<sup>th</sup>** | **2:30** pm CEST / UTC+2

I've been working in management consulting industry since 2010, when passion and interest led me to support and coach companies in managing the innovation processes, product development and organizational change.

My main background and expertise has been focused on project management methodologies and later with time I had the chance to develop it in the study and application of Visual Management, based on Lean Thinking approach.

Further, I've strengthened my professional profile working also on operations and support processes.

Recently my interest moved to the application of new technologies and Industry 4.0, especially 3D printing, and their impact on Business Transformation processes for companies.

Together with the consulting activity, since 2014 I've been appointed by the University of Pavia as Adjunct Professor for Applied Project Management course at Master in International Business and Entrepreneurship.

I also collaborate with the American magazine Project Management World Journal as International Correspondent from Italy, and I've been regularly involved as speaker at international conferences.
